

Luka Brasanac

IT Student — Elektrotehnicka skola "Zemun", Electrotechnical Engineer of Information Technologies (3rd of 5 years)

lukabrasanac2008@gmail.com github.com/lukabraske37 linkedin.com/in/luka-brasanac-81872139a
itch.io/luka372

18-year-old developer building projects since 2021, from video games to web applications and AI automation. Actively learning C#, ASP.NET, SQL and AI tools; developing games in Unity; building and deploying web projects; growing as a content creator. Participant and award winner across multiple hackathons and competitions, including 2nd place at Campfire Yettel Hackathon 2026 with the game Brufen.

EXPERIENCE

Game Developer (Independent Projects)

2021 - Present · Unity (C#), Unreal Engine, Roblox Studio, Blender

- Developed 2D and 3D games from concept through full implementation
- Started in Roblox Studio, moved to Unreal Engine, currently active in Unity + C#
- Used Blender for 3D modeling and asset creation; planned projects in Miro before implementation
- Projects published on GitHub and itch.io (itch.io/luka372)

Destroy The Island (Team Project with Mentor)

In Development

- Active development of a game within a team led by a mentor
- Project planning and organization in Miro; iterative, team-based development

Web & AI Developer (Personal Projects)

2024 - Present · C#, ASP.NET, SQL/MySQL, JavaScript, React, Node.js, Electron, Cloudflare, Render

- Building web projects with C#, ASP.NET, SQL and MySQL; frontend with HTML, CSS, JavaScript and jQuery
- Deploying and maintaining projects via Cloudflare and Render
- Built AI Council, an Electron desktop app that runs multiple AI assistants (ChatGPT, Claude, Gemini, etc.) side by side, with an isolated session per pane and saved layout presets

Content Creation & Social Media Management

2023 - Present

- Running two history-content YouTube channels: Steps Through Time (English) and Steps through time (Serbian)
- Managed a TikTok business account, reaching 1M+ views in the first month
- Social media management and marketing for local businesses (Bambola Pizzeria, Keramika Espana)
- Built and delivered a website for a client: design, development, deployment

- Video editing in DaVinci Resolve; graphic design in Affinity Photo

PROJECTS

- **AI Council** — Electron. Multi-pane desktop app running ChatGPT, Claude, Gemini and more side by side. github.com/lukabraske37/ai-council
- **AI Note Summarizer** — React + OpenAI. Summarizes text into key points and study notes. ai-note-summarizer.pages.dev
- **Mini Booking System** — React. Appointment booking webapp with an AI assistant and admin dashboard. mini-booking-system.pages.dev
- **Smart Notes REST API** — Node.js, Express, MongoDB, OpenAI. Backend API for note summarization with Swagger docs. smart-notes-api-tuns.onrender.com/api-docs
- **Brufen** — Game built with a 4-person team at Campfire Yettel Hackathon 2026, 2nd place. thylala.itch.io/yebetel-game-jam

COMPETITIONS & ACHIEVEMENTS

- **Campfire Yettel Hackathon (2026)** — 2nd place. Built the game Brufen with a 4-person team within a tight deadline; presented the final product to the jury.
- **Make It Day — Metropolitan University** — 1st place. "Build Your First AI Chatbot" workshop; hands-on AI chatbot development, competed against other participants.
- **MindWave Hackathon** — Participant. Team collaboration on concept and solution development in a competitive environment.

SKILLS

C#, Unity, Unreal Engine, Roblox Studio, Blender, ASP.NET, SQL / MySQL, Supabase, JavaScript, HTML & CSS, jQuery, React, Node.js, Electron, OpenAI API, Cloudflare, Render, GitHub, Git, Miro, DaVinci Resolve, Affinity Photo, Teamwork, Rapid Prototyping, English (fluent)
