

Luka Brasanac

IT Student — Elektrotehnicka skola "Zemun", Electrotechnical Engineer of Information Technologies (3rd of 5 years)

lukabrasanac2008@gmail.com github.com/lukabraske37 linkedin.com/in/luka-brasanac-81872139a
itch.io/luka372

18-year-old IT student building projects since 2021, from 2D game assets to web applications and AI tools. Works mostly in C# and Microsoft SQL Server, is learning Unity, and runs personal projects independently with AI assistance. Created the 2D assets and sound effects for two released game jam games, and was part of the 4-person team that placed 2nd at Campfire Yettel Hackathon 2026.

EXPERIENCE

2D Assets & Sound (Released Game Jam Games)

Credited as "Luka372" · paint.net

- The Cognitive Exam: created the 2D assets and sound effects (own recordings plus freesound library) — thylala.itch.io/the-cognitive-exam
- Kartomania: created the 2D assets, credited as Luka372 / ThyLala — thylala.itch.io/kartomania
- All artwork produced in paint.net; both titles publicly released on itch.io

Game Development (Self-Taught)

2021 - Present · Unity (C#), previously Roblox Studio and Unreal Engine

- Learning Unity and C# by building personal 2D prototypes
- Started in Roblox Studio, tried Unreal Engine, currently working in Unity
- Creates own 2D assets in paint.net; plans projects in Miro before implementation
- Projects published on GitHub and itch.io (itch.io/luka372)

Destroy The Island (Mentor-Led Learning Project)

In Development

- Learning game development on a real project; development is led by the mentor
- Follows project planning and organization in Miro and the team's iterative process

Web & AI Projects (Personal)

2024 - Present · C#, Microsoft SQL Server, JavaScript, Electron, Cloudflare, Render

- Runs personal projects independently from idea to release, with code written using AI assistance
- Database work in Microsoft SQL Server; frontend basics in HTML, CSS and JavaScript
- Deploying and maintaining projects via Cloudflare and Render
- Built AI Council, an Electron desktop app that runs multiple AI assistants (ChatGPT, Claude, Gemini, etc.) side by side, with an isolated session per pane and saved layout presets

Content Creation & Social Media Management

2023 - Present

- Runs the history-content YouTube channel Steps Through Time Balkan (youtube.com/@stepsthroughtimebalkan)
- Managed a TikTok business account, reaching 1M+ views in the first month
- Social media management and marketing for local businesses (Bambola Pizzeria, Keramika Espana)
- Built and delivered a website for a client: design, development, deployment
- Video editing in CapCut; graphics and 2D assets in paint.net

PROJECTS

- **The Cognitive Exam** — Released game jam title. Role: 2D assets and sound effects (credited as Luka372). thylala.itch.io/the-cognitive-exam
- **Kartomania** — Released game jam title. Role: 2D assets (credited as Luka372 / ThyLala). thylala.itch.io/kartomania
- **AI Council** — Electron. Multi-pane desktop app running ChatGPT, Claude, Gemini and more side by side. Built independently with AI assistance. github.com/lukabraske37/ai-council
- **AI Note Summarizer** — React + OpenAI. Summarizes text into key points and study notes. ai-note-summarizer.pages.dev
- **Mini Booking System** — React. Appointment booking webapp with an AI assistant and admin dashboard. mini-booking-system.pages.dev
- **Smart Notes REST API** — Node.js, Express, MongoDB, OpenAI. Backend API for note summarization with Swagger docs. smart-notes-api-tuns.onrender.com/api-docs
- **Brufen** — Game built by a 4-person team at Campfire Yettel Hackathon 2026, 2nd place. thylala.itch.io/yebetel-game-jam

COMPETITIONS & ACHIEVEMENTS

- **Campfire Yettel Hackathon (2026)** — 2nd place. Member of the 4-person team that built the game Brufen within a tight deadline; first competitive game development experience.
- **Make It Day — Metropolitan University** — 1st place. "Build Your First AI Chatbot" workshop; hands-on AI chatbot development, competed against other participants.
- **MindWavE Hackathon** — Participant. Team collaboration on concept and solution development in a competitive environment.

SKILLS

Work independently:

C#, Microsoft SQL Server, paint.net (2D assets), CapCut, AI tools / prompt engineering, GitHub, Git, Cloudflare, Miro, Teamwork, English (fluent)

Learning / basics:

Unity, ASP.NET, MySQL, Supabase, JavaScript, HTML & CSS, React, Node.js, Electron, OpenAI API, Render, Unreal Engine, Roblox Studio, Blender, DaVinci Resolve

EDUCATION

Elektrotehnicka skola "Zemun"

Electrotechnical Engineer of Information Technologies — 3rd of 5 years
